This is fine but recommended to put in a drum liner so it does not leak and also packaging/material when placing in drum so it does not move or break in transit. Note on drum label fragile also and material type inside.

Thank you.
Regards,

Yvette Roberts

Hi Michelle, Good Morning.

Does the manometer fit completely in the 55 gallon drum and is it enclosed?

Thank you.

Regards,

Yvette Roberts

The manometer has been placed into a 55-gallon drum packed with vermiculite. Would you please advise on if there are any additional requirements for packaging that I need to follow?
